# 1. Welcome and roles

Third State Café HR is the web app for running people operations across our entities and branches: staff records, documents, schedules, attendance, leave, payroll, workflow alerts and the audit trail. It runs in the browser at **hr.thirdstate.ae**. There is nothing to install.

This guide is for the people who run the system: the **Owner**, **Entity Admins** and **Location Managers**. Café staff have their own short Employee Guide.

## The four roles

- **Owner** – sees every entity (for example Third State Cafe and Ateej Tea Brew) and switches between them.
- **Entity Admin** – runs one entity: its branches, people, access, schedules, payroll and workflows.
- **Location Manager** – runs one branch day to day: schedules, attendance, leave and document checks. A Location Manager **never** sees salaries, payroll or payslips.
- **Staff** – sees only their own records: shifts, clock, leave, documents, payslips and profile.

### Approving a payroll run

The Owner approves payroll runs. An Entity Admin can approve only when the Owner has turned on Entity Admin self-approval.

### Good to know

The menu only shows the areas your role can use. Every entity's data is kept separate: records never mix between entities. All dates and times are Dubai time.

## Who can do what

“Own” means the person’s own entity, branch or records. Everyone has Notifications.

| Task                                  | Owner                   | Entity Admin               | Location Manager                  | Staff                    |
|---------------------------------------|-------------------------|----------------------------|-----------------------------------|--------------------------|
| See data for                          | All entities (switcher) | Own entity                 | Own branch                        | Own records              |
| Create or edit entities               | Yes                     | –                          | –                                 | –                        |
| Add or edit branches                  | Yes                     | Own entity                 | –                                 | –                        |
| Grant or revoke access                | Yes                     | Own entity (not Owner)     | –                                 | –                        |
| Bulk import employees                 | Yes                     | Own entity                 | –                                 | –                        |
| Edit employee details                 | Yes                     | Yes                        | Contact fields and position       | Request a change         |
| Activate a new starter                | Yes                     | Yes                        | Pre-boarding → Active, own branch | –                        |
| Schedules: templates, drafts, publish | Yes                     | Yes                        | Own branch                        | See own published shifts |
| Attendance exceptions and corrections | Yes                     | Yes                        | Own branch (not own record)       | Own clock in / out       |
| Approve or reject leave               | Yes                     | Yes                        | Own branch                        | Request and cancel own   |
| Review documents                      | Yes                     | Yes                        | Own branch, non-sensitive types   | Upload own               |
| Payroll, salaries and payslips        | Yes                     | Yes (approval: see note)   | Never                             | Own published payslips   |
| Workflow rules                        | Yes                     | Own entity                 | –                                 | –                        |
| Reports and audit log                 | All, can export CSV     | Own entity, can export CSV | Own branch, view only             | –                        |

## 2. Signing in

1. Open **https://hr.thirdstate.ae** in Chrome, Safari or Edge.
2. Enter your **Work email** and **Password**. Tap **Show** to check what you typed.
3. Click **Sign in**. You land on **Home**, and the menu on the left shows only your role's areas.
4. When you finish, click **Sign out** (top right), especially on a shared computer.

Figure 1 – The sign-in screen.

### No self sign-up

People cannot create their own account. Access is given by email in **Admin** → **Users & access** (see section 4), and the Owner creates the login in the Supabase dashboard. The app sends no invitation email and has no “forgot password” page: if someone forgets their password, the Owner resets it (see section 16).

## 3. The dashboard and switching entity

**Home** is your daily starting point. For the Owner it has three parts:

- **Group overview** – totals across all entities: active employees, pre-boarding, documents expired and expiring in 30 days, documents to review, pending leave, open payroll runs and open requisitions.
- **Entity cards** – figures for the entity you have selected: employees, documents expiring in 30 days, pending leave requests and current payroll.
- **Action centre** – the items waiting for someone (expiring documents, pending leave). Click **Open** to go straight to the item. **Operational coverage** shows active staff per branch.

Figure 2 – Owner dashboard: group overview, entity figures and the Action centre.

### Switch entity (Owner only)

1. Click the entity name at the top left of the screen (the switcher) and choose the entity you want to work in.
2. Every page now shows that entity only: People, Schedules, Payroll, Reports and so on.
3. Check the entity name above the page title (for example THIRD STATE CAFE) before you publish a schedule or approve payroll.

Figure 3 – The entity switcher, top left (red outline added for this guide).

# 4. Setting up

## 4.1 Entities and branches

1. Go to **Admin** → **Entities & branches**.
2. Owner: click **New entity** to add a legal entity, or **Edit** to change its details (code, emirate, licence, currency, payroll day).
3. Owner or Entity Admin: click **Add branch** under the entity, or **Edit** next to a branch.
4. To close an entity or branch, edit it and make it inactive. Before you confirm, the app shows what still depends on it (active employees, future shifts, draft payroll runs, open leave).

Figure 4 – Entities and their branches.

### Nothing is deleted

Entities and branches are never deleted. Make them inactive instead, so history stays intact.

## 4.2 Adding people one by one

Go to **People** to see everyone in the entity. Search by name or email, or filter by status and branch. Click a name to open the profile. Pending **Contact change requests** from staff appear at the top: click **Approve** or **Reject**.

The screenshot shows the 'People' section of the Third State HR system. On the left is a sidebar with navigation links: Home, People (selected), Schedules, Attendance, Leave, Documents, Recruiting, Payroll, Reports, Workflows, Admin, and Notifications. The top header includes the 'Third State HR' logo, a dropdown for 'Third State Cafe', a user profile for 'Aisha A.' with a 'Sign out' button, and an 'Import employees' button. The main content area is titled 'THIRD STATE CAFE People' and shows '6 of 6 employees'. A 'Contact change requests' section at the top indicates '1 pending' request. The request details show 'Priya Nair' changing her phone number from '+971 56 702 3318' to '+971 56 702 9950', requested on '25 Sept 2026' with the note '\*New number from du'. There are 'Approve' and 'Reject' buttons for this request. Below this is a search bar and filters for 'All statuses' and 'All branches'. A table lists the employees with columns for NAME, ROLE, BRANCH, EMPLOYMENT, STATUS, and JOINED.

| NAME                                                | ROLE           | BRANCH                   | EMPLOYMENT | STATUS       | JOINED     |
|-----------------------------------------------------|----------------|--------------------------|------------|--------------|------------|
| <b>Ahmed Raza</b><br>ahmed.raza@thirdstate.ae       | Barista        | Corporate Concession     | Part Time  | Active       | 2026-02-09 |
| <b>Joseph Mwangi</b><br>joseph.mwangi@thirdstate.ae | Barista        | Expo City CRC Concession | Full Time  | Active       | 2026-03-02 |
| <b>Maria Santos</b><br>maria.santos@thirdstate.ae   | Barista        | Expo City CRC Concession | Full Time  | Active       | 2026-01-12 |
| <b>Noura Khalil</b><br>noura.khalil@thirdstate.ae   | Barista        | Expo City CRC Concession | Full Time  | Pre Boarding | 2026-10-04 |
| <b>Omar Haddad</b><br>omar.haddad@thirdstate.ae     | Shift Lead     | Expo City CRC Concession | Full Time  | Active       | 2025-11-10 |
| <b>Priya Nair</b><br>priya.nair@thirdstate.ae       | Senior Barista | Expo City CRC Concession | Full Time  | Active       | 2025-12-01 |

Figure 5 – The People directory with a pending contact change request.

## 4.3 Bulk import

1. Go to **Admin** → **Bulk import** (or **People** → **Import employees**).
2. Click **Download template**, fill it in, then click **Upload CSV**, or paste the rows into the box.
3. Columns: **full\_name** (required), email, gender, employment\_type, join\_date, branch, position.
4. Check the **Preview**. Every row must say **Ready**. Fix any row with an error.
5. Click **Import N employee(s)**. New people are created as **Pre-boarding**.

The screenshot shows the 'Bulk import' page in the Third State HR system. The left sidebar contains navigation links: Home, People, Schedules, Attendance, Leave, Documents, Recruiting, Payroll, Reports, Workflows, Admin (selected), and Notifications. The main content area is titled 'Admin' and includes a sub-header 'Entities, branches, user access, policies and imports.' Below this are tabs for 'Entities & branches', 'Users & access', 'Policies', and 'Bulk import' (selected). The 'Bulk import' section contains instructions: 'Import new employees into **Third State Cafe**. They're created as **Pre-boarding**. The import is all-or-nothing: if any row has a problem, nothing is saved.' There are buttons for 'Download template' and 'Upload CSV'. Below these is a text area for pasting CSV data, which contains the following sample data:

```
full_name,email,gender,employment_type,join_date,branch,position
Layla Haddad,layla.haddad@thirdstate.ae,female,full_time,2026-10-11,Expo City CRC Concession,Barista
Carlos Reyes,carlos.reyes@thirdstate.ae,male,part_time,2026-10-11,Corporate Concession,Barista
Aigerim Sadykova,aigerim.s@thirdstate.ae,female,full_time,2026-10-18,Expo City CRC Concession,Senior Barista
```

Below the text area, it says 'Columns: full\_name (required), email, gender, employment\_type, join\_date, branch, position.' A 'Preview' section shows '3 row(s): 3 ready, 0 with errors' and an 'Import 3 employee(s)' button. The preview table lists the following rows:

| Row   | Employee Name    | Email                      | Gender | Employment Type | Join Date  | Branch                   | Position       | Status |
|-------|------------------|----------------------------|--------|-----------------|------------|--------------------------|----------------|--------|
| Row 1 | Layla Haddad     | layla.haddad@thirdstate.ae | female | full_time       | 2026-10-11 | Expo City CRC Concession | Barista        | Ready  |
| Row 2 | Carlos Reyes     | carlos.reyes@thirdstate.ae | male   | part_time       | 2026-10-11 | Corporate Concession     | Barista        | Ready  |
| Row 3 | Aigerim Sadykova | aigerim.s@thirdstate.ae    | female | full_time       | 2026-10-18 | Expo City CRC Concession | Senior Barista | Ready  |

Figure 6 – Bulk import preview: 3 rows ready, 0 with errors.

### All or nothing

If any row has a problem, nothing is saved. Fix the row and import again.

## 4.4 Granting and revoking access

An employee record and a login are separate. To let someone sign in, grant access to their work email.

1. Go to **Admin** → **Users & access** and click **Grant access**.
2. Enter the **Email** and choose the **Role**.
3. Choose the **Entity**. For a Location Manager also choose the branch. For Staff choose the **Linked employee** (only employees without a login are listed).
4. Click **Grant access**. The list shows **Pending Activation** and “Invite not yet accepted” until the person signs in for the first time.

### Important – create the login (Owner)

The app sends no invitation email and has no sign-up or “forgot password” page. A grant only takes effect once a login exists for that email. After granting access, the Owner creates the login:

1. Open the **Supabase dashboard** and choose project **TS-HR**.
2. Go to **Authentication** → **Users** and click **Add user**.
3. Choose **Send invitation**, or **Create new user** with a temporary password that you share with the person privately. Use the **same email** as the grant.
4. The person sets their password from the invitation email (or uses the temporary password) and signs in at **hr.thirdstate.ae**.
5. The pending grant applies automatically at that first sign-in, and the status changes to Active.

Figure 7 – The Grant access drawer for a new staff member.

### Revoke access

1. In **Users & access**, find the person (use **Search users**; the Owner can tick **Show all entities**).
2. Click **Revoke** and enter a reason. A reason is required and is kept in the audit log.

Owner

Figure 8 – Users &amp; access: roles, entity, branch, status and last sign-in.

## Limits

An Entity Admin can grant and revoke access only inside their own entity, and can never create or remove an Owner.

# 5. Employee records and activation

Open an employee from **People**. The header shows the status (Candidate, Pre Boarding, Active or Inactive) and the **Profile completeness** bar. The tabs hold everything about the person: Overview, Employment, Documents, Schedule, Attendance, Leave, Payslips and Audit.

Figure 9 – An active employee at 100% profile completeness.

## Edit details

1. Click **Edit details**, make the change, check the preview and confirm.
2. The before and after values are saved in the **Audit** tab.

### Location Managers

A Location Manager can edit contact details, emergency contact, preferred name and position for their own branch. Other fields are for the Owner or Entity Admin.

## Activate a new starter

1. Open the Pre-boarding employee and click **Activate**.
2. If key documents are missing, the dialog lists them and **Activate** stays disabled.
3. Upload and approve the missing documents on the **Documents** tab, then try again.
4. Add an optional note and click **Activate**.

Figure 10 – Activation blocked: visa, Emirates ID and contract are missing.

### The key-document rule

An employee can be activated only when these documents are **approved and in date**: passport, visa (not needed for UAE nationals), Emirates ID and employment contract.

## Inactivate

Click **Inactivate** and give a reason. This switches off the person's login and cancels their future unpublished shifts. The Owner or an Entity Admin can reactivate them later, also with a reason. Nobody can change their own status.

## 6. Schedules

Schedules work in three steps: set up **recurring templates**, **generate drafts** for a period, then **publish**. Draft shifts are for planning only.

### Staff only see published shifts

Draft shifts are never visible to staff. If an employee says they cannot see a shift, check that the period was published.

### Step by step

1. Go to **Schedules** and choose the **Branch**.
2. Under **Recurring templates**, click **New template**: choose the employee, day of the week, start and end time, break, role and the date it starts. Repeat for each weekly pattern.
3. In the row below the templates, choose the branch, **Period start** and **Period end**, then click **Generate drafts**.
4. Check the draft shifts in the table. Drafts carry a Draft label.
5. Click **Publish period** and confirm. The shifts become visible to staff, and they get a “schedule published” notification.

The screenshot displays the 'Schedules' management interface. The top navigation bar includes the company logo, user profile (Aisha A.), and a 'Sign out' button. The left sidebar lists various HR functions, with 'Schedules' currently selected. The main content area is titled 'THIRD STATE CAFE Schedules' and indicates 36 shifts. A 'New shift' button is in the top right. Below the title, there's a section for 'Swap requests awaiting your decision' showing a request for Priya Nair to swap with Joseph Mwangi on Tue, 29 Sept. A 'Branch' dropdown is set to 'Expo City CRC Concession'. The 'Recurring templates' section lists several templates for different employees and roles, each with a 'Deactivate' button. At the bottom, there's a section for 'Attendance exceptions & corrections' with a table showing shifts for Wed, 23 Sept. The table has columns for DATE, TIME, BRANCH, ROLE, ASSIGNED TO, STATUS, and ACTIONS.

| DATE         | TIME        | BRANCH                   | ROLE       | ASSIGNED TO   | STATUS   | ACTIONS |
|--------------|-------------|--------------------------|------------|---------------|----------|---------|
| Wed, 23 Sept | 12:00–20:00 | Expo City CRC Concession | Barista    | Maria Santos  | Assigned | Cancel  |
| Wed, 23 Sept | 09:00–17:00 | Expo City CRC Concession | Shift Lead | Omar Haddad   | Assigned | Cancel  |
| Wed, 23 Sept | 12:00–20:00 | Expo City CRC Concession | Barista    | Joseph Mwangi | Assigned | Cancel  |

Figure 11 – Schedules: swap requests, recurring templates, generate/publish controls and the shift table (top of the page).

## Changing a published shift

- **Cancel** a shift from the **Actions** column and confirm. Staff are told about changes to published shifts.
- **New shift** (top right) adds a one-off shift. Leave *Assign to* blank to post it as an open shift. A new shift starts as a draft, so publish the period again to make it visible.
- **Swaps** – staff can request a swap on a published shift and a colleague can claim it. The request appears under **Swap requests awaiting your decision**. Click **Approve** (the shift is reassigned) or **Reject**.
- **Deactivate** a template to stop it creating future drafts. Existing shifts are not removed.

## 7. Attendance

Staff clock in and out on their phones. **Attendance** compares planned shifts with actual clock times for a branch and date range.

1. Go to **Attendance**, choose the **Branch**, the **From** and **To** dates, and click **Refresh**.
2. The cards show shifts in range, exceptions, pending adjustments and final payable hours.
3. Open the **Exceptions** tab.

The screenshot shows the 'Attendance' section of the Third State HR system. The left sidebar contains navigation links: Home, People, Schedules, Attendance (selected), Leave, Documents, Recruiting, Payroll, Reports, Workflows, Admin, and Notifications. The main content area is titled 'Attendance' with the subtitle 'Planned shifts vs actual clock-ins, exceptions and payable time.' It features a filter section with 'Branch' set to 'Expo City CRC Concession', 'From' date '09/20/2026', and 'To' date '09/26/2026', with a 'Refresh' button. Below this are four summary cards: '19 Shifts in range', '3 Exceptions', '0 Pending adjustments', and '133h Final payable'. The 'Exceptions' tab is active, showing a table with columns: DATE, EMPLOYEE, EXCEPTION, PLANNED, ACTUAL, and a 'Correct' button. The table lists three exceptions: Joseph Mwangi (Missing clock-out), Maria Santos (Late clock-in), and Priya Nair (Shift never clocked). The bottom of the page shows the user 'Aisha A.' and a 'Sign out' button.

| DATE         | EMPLOYEE      | EXCEPTION           | PLANNED     | ACTUAL      |                        |
|--------------|---------------|---------------------|-------------|-------------|------------------------|
| Wed, 23 Sept | Joseph Mwangi | Missing clock-out   | 12:00–20:00 | 12:02—      | Correct                |
| Thu, 24 Sept | Maria Santos  | Late clock-in       | 09:00–17:00 | 09:14–17:02 | Correct                |
| Tue, 22 Sept | Priya Nair    | Shift never clocked | 09:00–17:00 | —           | No clock-in to correct |

Figure 12 – Attendance exceptions for one branch and week.

### Types of exception

| Exception           | What it means                                               | What to do                                                                 |
|---------------------|-------------------------------------------------------------|----------------------------------------------------------------------------|
| Missing clock-out   | The person clocked in but never clocked out.                | Click <b>Correct</b> and add the clock-out time.                           |
| Late clock-in       | Clock-in was after the planned start. For information only. | Talk to the person. Correct only if the time is wrong.                     |
| Shift never clocked | A published shift has no clock-in.                          | There is nothing to correct. Check with the person (absence, leave, swap). |

# Correct an attendance record

1. Click **Correct** on the exception.
2. The drawer shows the planned and actual times. Enter the **New clock-in** and/or **New clock-out** (Dubai time). Leaving the clock-out empty keeps the current value.
3. Type a clear **Reason**. It is required, saved in the audit trail and shown to the employee.
4. Click **Review changes**, check, and confirm.

**Correct attendance**  
Joseph Mwangi · Wed, 23 Sept · Missing clock-out

|         | Clock-in            | Clock-out |
|---------|---------------------|-----------|
| Planned | 12:00               | 20:00     |
| Actual  | 23 Sept 2026, 12:02 | —         |

**New clock-in (Dubai time) \***  
09/23/2026, 12:02 PM

**New clock-out (Dubai time)**  
09/23/2026, 08:04 PM

Clearing this keeps the current clock-out. You cannot correct your own record.

**Reason \***  
Forgot to clock out after closing. Confirmed with the closing checklist signed at 20:04.

Recorded in the audit trail and shown to the employee.

Cancel Review changes

Figure 13 – Correcting a missing clock-out. A reason is required.

## Corrections never change pay by themselves

The original times are kept in the record history. You cannot correct your own record. Lateness or absence never changes pay automatically: hours and overtime are entered and confirmed in the payroll run (section 10).

The **Payable adjustments** tab is for proposing a change to payable minutes, with a reason. A Location Manager can propose; the Owner or Entity Admin applies or rejects it.

# 8. Leave approvals

1. Go to **Leave**. Requests waiting for you are under **Awaiting your decision**, with type, dates, days, remaining balance and the reason.
2. Click **Approve** or **Reject**. The employee is notified.
3. Past decisions are listed under **Recent decisions**.

Figure 14 – Leave queue for a Location Manager.

- When a request is submitted, the days are **held** from the balance while it is pending. Approving uses those held days once; rejecting or cancelling releases them.
- A request above the available balance needs the Owner or an Entity Admin to approve with an override and a reason.
- Nobody can approve their own leave.

## Stay on top of requests

The starter workflow rule “Tell the manager about new leave requests” sends the Location Manager a notification for each new request (section 11).

## 9. Documents review and renewals

Staff upload their documents (for example passport, visa, Emirates ID, contract, health card) and renewals from their phones. Each upload waits as **Pending Review** until someone approves it.

1. Go to **Documents**. Use the search and the filters to find items pending review or expiring.
2. Click **Review**. Click **View file** to open it and check the **Version history**.
3. Click **Approve**, or **Reject** and give a reason. The employee is notified.

Figure 15 – Reviewing a health card renewal (version 2).

### How renewals work

- A renewal is a new version. The old approved version **stays current** until the renewal is approved; then it is replaced.
- Expiry alerts start **30 days before** the expiry date. They appear on Home, in the Action centre and in Notifications.
- **Discard** removes a pending upload. **Clean up incomplete uploads** clears uploads that were never finished.

#### Who can approve

Nobody can approve their own document. Location Managers review ordinary documents for their branch; sensitive types (passport, Emirates ID, visa, contract, bank/payment, compensation) are for the Owner or Entity Admin. When the Owner turns on **Entity Admin self-approval**, an Entity Admin may approve their own uploads of ordinary documents only; sensitive documents always need Owner approval.

## 10. Payroll

### Owner and Entity Admin only

Location Managers never see Payroll, salaries or payslips. The menu item is hidden and the page is blocked.

A payroll run moves forward through four stages and never goes back:

| Stage            | What it means                                                 | Who sees payslips                    |
|------------------|---------------------------------------------------------------|--------------------------------------|
| <b>Draft</b>     | You enter hours, tips and deductions and run the calculation. | Owner and Entity Admin only          |
| <b>In review</b> | Locked. Timesheets, tips and deductions cannot change.        | Owner and Entity Admin only          |
| <b>Approved</b>  | Final. Payslips are published.                                | Each employee sees their own payslip |
| <b>Paid</b>      | Salaries have been paid out.                                  | Each employee sees their own payslip |

The screenshot shows the 'Payroll' section of the Third State HR system. The left sidebar contains navigation links: Home, People, Schedules, Attendance, Leave, Documents, Recruiting, Payroll (highlighted), Reports, Workflows, Admin, and Notifications. The top right shows the user 'Aisha A.' with a 'Sign out' button. The main content area is titled 'THIRD STATE CAFE Payroll' and shows '3 payroll runs'. A table displays the following data:

| PERIOD                  | STATUS   | EMPLOYEES | NET PAY       | ACTIONS              |
|-------------------------|----------|-----------|---------------|----------------------|
| 2026-09-01 – 2026-09-30 | Draft    | 5         | AED 23,366.25 | <a href="#">Open</a> |
| 2026-08-01 – 2026-08-31 | Approved | 5         | AED 23,547.50 | <a href="#">Open</a> |
| 2026-07-01 – 2026-07-31 | Paid     | 5         | AED 23,020.50 | <a href="#">Open</a> |

A 'New payroll run' button is located in the top right corner of the main content area. The bottom left of the sidebar shows the user role 'Owner'.

Figure 16 – Payroll runs with their status and total net pay.

## The monthly cycle, step by step

1. Go to **Payroll**. Click **New payroll run** for the month, or **Open** the existing draft.
2. **Timesheets**: for each employee choose the name, enter **Regular**, **Overtime** and **Holiday** hours and click **Add**. Use Attendance (section 7) to check the hours.
3. **Tips pools**: record the tips for each branch. The run header shows how tips are shared (for example “Split equally”).
4. **Deductions**: choose the employee and type (for example uniform, cash shortage, advance, other), enter the amount and click **Add**. Add deductions before you calculate.
5. Tick **Overtime & holiday pay confirmed** and **Tips distribution confirmed**. Overtime and holiday rates and pooled tips only apply when these are ticked.
6. Click **Run calculation (Recalculate after changes)**. Check each line in **Payslips**: base, overtime, holiday, tips, deductions and net pay. Click **PDF** to see a payslip.
7. Click **Send to review**. The run is now **In review** and locked.
8. The approver clicks **Approve run**. Payslips are now visible to staff in the app.
9. After salaries are paid, click **Mark as paid**.

### Payslip PDFs

The **PDF** button on each payslip row opens a printable payslip. Staff can download the same PDF from their phones once the run is approved.

Figure 17 – A draft run: confirmations, timesheets, tips pools, deductions and payslips.

## Corrections: Create revision

1. Open the approved or paid run.
2. Click **Create revision for corrections**. A new draft run is created, linked to the original and filled from it.
3. Make the corrections in the new draft and take it through review and approval as usual.

### Published payslips are never changed

Once a run is approved, its payslips, timesheets, tips and deductions are locked for good. The original stays exactly as it was; corrections always go through a revision.

# 11. Workflows

Workflow rules send automatic **in-app notifications** when something happens. Rules only notify: they never change records and they do not send email or SMS. Owner and Entity Admin only.

Figure 18 – Workflow rules, including the ready-made starter rules.

Starter rules are ready to use: tell the manager about new leave requests; late clock-in alert; document expiring within 30 days; let staff know their payslip is ready. Click **Activate** or **Deactivate** to turn one on or off.

## Create a rule

1. Click **New rule** and give it a **Rule name**. (Owner: choose the entity first.)
2. **1. Module** – Leave, Documents, Attendance, Schedules or Payroll.
3. **2. When this happens** – choose the trigger, for example *Late clock-in*.
4. **3. Only if (optional)** – tick **Add a condition** and set field, operator and value, for example minutes late is at least 10.
5. **4. Then** – **Notify a role** (Owner, Entity Admin, Location Manager or Staff) or notify the employee, and write a short message.
6. Read the **Summary** at the top. It says in plain words what the rule will do.
7. Click **Create rule**. Nothing runs until you activate it.
8. Click **Test** with sample values to see *matched* or *skipped*. A test never sends a real notification.
9. Click **Activate**. Check **Run history** to see when it fired.

### Keep messages safe

Never put salary, bank or document numbers in a message.

**New workflow rule** ×

Build the rule step by step. Nothing runs until you activate it.

**SUMMARY**  
When an employee clocks in late and minutes late  $\geq 10$ , notify Location Manager.

**Rule name \***  
Late clock-in alert (10+ minutes)

**1. Module**  
 Leave Documents **Attendance** Schedules Payroll

**2. When this happens**  
 Trigger  
 Late clock-in

**3. Only if (optional)**  
☒ Add a condition  
 Field: Minutes late Operator: is at least Value: 10

**4. Then**  
 Action: Notify a role Who: Location Manager  
 Notification message \*  
 A team member clocked in 10 or more minutes late. Check Attendance.  
Keep it short and say what action is needed.

Cancel Create rule

Figure 19 – The rule builder with its plain-language summary.

### Branch-level recipients

When a rule notifies Location Managers or Staff, only people at the branch where the event happened receive it.

# 12. Reports and audit

- 1. Go to **Reports**. The cards show current totals: active employees, open requisitions, documents pending review, leave pending, open shifts, swaps awaiting approval and payroll runs in progress.
- 2. In **Audit log**, filter by module, record type, action, actor, date range, employee, branch or entity.
- 3. Owner or Entity Admin: click **Export CSV** to download the filtered log. The export itself is recorded in the audit log.

Figure 20 – Reports summary cards and the filterable audit log.

## What is audited

Important actions are recorded with who did them and when: for example clock-outs, payroll calculations, document submissions, leave decisions, published schedules, payslip views and employee changes.

# 13. Notifications

1. The bell at the top shows how many notifications are unread. Click it, or go to **Notifications**.
2. Tick **Show unread only** to filter. Items marked **High priority** need action soon.
3. Click **Mark all as read** to clear the count.

Figure 21 – Notifications: payroll ready to review, documents to review, leave, expiring visa.

Notifications come from the system (for example a document waiting for review) and from active workflow rules (section 11).

# 14. What a Location Manager sees

A Location Manager works inside one branch. The entity name at the top is fixed (no switcher). The menu has Home, People, Schedules, Attendance, Leave, Documents, Recruiting, Reports, **My clock** and Notifications.

Figure 22 – Location Manager home: no Payroll, Workflows or Admin.

| Can do                                               | Cannot do                                         |
|------------------------------------------------------|---------------------------------------------------|
| Publish schedules and approve swaps for the branch   | See Payroll, salaries or any payslip              |
| Review and correct attendance (not their own record) | Open Workflows or Admin                           |
| Approve or reject leave for the branch               | Approve leave above balance (override)            |
| Review ordinary documents for the branch             | Approve sensitive documents or their own          |
| Activate a Pre-boarding starter at their branch      | Grant access, import people, export the audit log |
| Clock in and out for their own shifts (My clock)     | See other branches or entities                    |

## 15. Checklists

### Monthly checklist – Owner / Entity Admin

- ☐ Home: check the Group overview and Action centre for each entity (use the switcher).
- ☐ Documents: approve pending uploads; chase anything expiring in the next 30 days.
- ☐ People: approve contact change requests; activate new starters once their key documents are approved.
- ☐ Users & access: grant access to new starters; revoke leavers (with a reason).
- ☐ Attendance: clear missing clock-outs and decide pending payable adjustments.
- ☐ Payroll: timesheets → tips → deductions → tick both confirmations → Run calculation → check payslips → Send to review.
- ☐ Payroll: Approve run → pay salaries → Mark as paid. Use Create revision for any correction.
- ☐ Workflows: check Run history; make sure the rules you need are Active.
- ☐ Reports: review the audit log; export CSV if you need a record.

### Daily and weekly checklist – Location Manager

#### Every day

- ☐ Home and Notifications: look at the Action centre and unread items.
- ☐ Attendance → Exceptions: correct missing clock-outs (with a reason); follow up late clock-ins and shifts never clocked.
- ☐ Leave: approve or reject new requests.
- ☐ Schedules: decide swap requests.

#### Every week

- ☐ Schedules: generate drafts for the coming period, check them, then **Publish period**.
- ☐ Documents: review pending uploads; remind staff whose documents expire within 30 days.
- ☐ People: approve contact change requests for your branch.

## 16. FAQ and troubleshooting

| Problem                                        | Likely reason and fix                                                                                                                                                                                                                                                                                                |
|------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Someone cannot sign in                         | Check <b>Admin</b> → <b>Users &amp; access</b> : is there an Active or Pending grant for that exact email, and not Revoked? Check the email spelling. Then check that a login exists for the same email in Supabase → Authentication → Users (section 4.4). A wrong password shows an “invalid credentials” message. |
| An employee forgot their password              | Owner: in the Supabase dashboard open <b>Authentication</b> → <b>Users</b> , select the user and click <b>Send password recovery</b> . The person sets a new password from the email. There is no reset on the sign-in page.                                                                                         |
| An employee cannot see a shift                 | The shift is still a <b>draft</b> . Staff only see published shifts. Go to Schedules and click <b>Publish period</b> for those dates.                                                                                                                                                                                |
| I cannot activate an employee                  | Key documents are missing, not approved or out of date. The dialog names them. Approve passport, visa (not for UAE nationals), Emirates ID and contract on the Documents tab.                                                                                                                                        |
| An employee is not in the Linked employee list | That employee already has a login. Only employees without a login are listed.                                                                                                                                                                                                                                        |
| I cannot correct an attendance record          | You cannot correct your own record, and a reason is required. “Shift never clocked” has no clock-in to correct.                                                                                                                                                                                                      |
| A correction did not change the pay            | Correct. Nothing changes pay automatically. Enter the hours in the payroll run timesheets.                                                                                                                                                                                                                           |
| Overtime or tips are missing from payslips     | Tick <b>Overtime &amp; holiday pay confirmed</b> and <b>Tips distribution confirmed</b> , then click <b>Recalculate</b> .                                                                                                                                                                                            |
| I cannot edit a payroll run                    | It is In review, Approved or Paid, so it is locked. For approved or paid runs use <b>Create revision for corrections</b> .                                                                                                                                                                                           |
| A staff member cannot see their payslip        | The run is not approved yet. Payslips appear only after <b>Approve run</b> .                                                                                                                                                                                                                                         |
| A Location Manager asks for payroll            | This is by design. Location Managers never see salaries, payroll or payslips.                                                                                                                                                                                                                                        |
| I see the wrong entity’s data                  | Owner: check the entity switcher at the top. Data never mixes between entities.                                                                                                                                                                                                                                      |
| A leave approval is refused                    | The request is above the balance. The Owner or an Entity Admin must approve with an override and a reason.                                                                                                                                                                                                           |
| A workflow rule is not firing                  | Check it is <b>Active</b> , the condition is right (use <b>Test</b> ), and look in <b>Run history</b> . Rules send in-app notifications only.                                                                                                                                                                        |
| Times look wrong                               | All times in the app are Dubai time.                                                                                                                                                                                                                                                                                 |
